

Learn More. Lead Better.™

The **Institute for Credentialing Excellence** notes that a high-quality certification validates an individual's knowledge, skills, and abilities in a defined profession, occupation, skill, or role. Certified individuals in the workforce reduce risk and enhance consumer protection and public safety. In addition, certifications allow employers and other stakeholders to identify individuals with the competencies needed to perform a role or task.

Certification holders' benefits include increased recognition, improved opportunities, greater confidence, better compensation and career longevity.

Employers benefit from qualified individuals for employment or advancement, with fewer risks of error, reduced employee turnover and increased job satisfaction.

Consumer benefits include objective assessment of competence, consumer protection, accountability and recertification requirements.

The **Resilience-Building Leader Program** is the credentialing body for the Resilience-Building Leadership Professional™ (RBLP™) series of leadership certifications. Founded on the premise that collective resilience is essential for organizational learning and change, RBLP's purpose is to share this truth with leaders everywhere to develop a worldwide community of practice committed to the idea of Building Resilient Teams™.

The RBLP leadership certifications are for front-line supervisors, middle managers, and senior leaders.

Certification exams cover Creating a Positive Climate, Developing Cohesion, Providing Purpose, Facilitating Team Learning, and Supporting Organizational Learning.

Building resilient teams that can work together to overcome adversity in a challenging environment is a core competency for leaders at all levels.
